SUMMARY

Software Engineer with around 2 years building **Spring Boot microservices** on **Kubernetes (AKS)** serving 500K+ daily API requests. Expertise in **Java 17**, **Kafka**, **Redis**, **Spring Security** (JWT/OAuth2), and **CI/CD (Continuous Integration/Delivery)** with **SonarQube**. Improved API response times by **30%**, system capacity by **25%**, and cut recurring bugs by **25%**. Skilled in monitoring with **Prometheus**, **Grafana**, and **ELK Stack**.

EXPERIENCE

- Software Engineer | Gap Inc. | Hyderabad** July 2024 – Present
 - Spearheaded API Gateway migration (Apigee to CDP) across **15+ microservices**, collaborating with DevOps and QA to achieve zero downtime and **30% stronger API security**.
 - Implemented **JWT Authentication** and **RBAC** using **Spring Security** for all **REST APIs**, reducing unauthorized access by **40%**.
 - Engineered **Redis** caching across distributed **Spring Boot** services, cutting API response time by **30%**.
 - Architected **Kafka** event-driven workflows to decouple microservices, improving throughput by **25%**.
 - Led code reviews and refactored legacy services using **clean code principles**, cutting defects by **25%**.
 - Orchestrated CI/CD pipelines (**Jenkins**, **Git**, **SonarQube**), shortening release cycles by **20%**. Mentored 2 junior engineers.
 - Enhanced observability via **Prometheus**, **Grafana**, and **ELK Stack**, cutting incident detection time by **30%**.
- Web Development Intern | Indian Railways | Jaipur** June 2023 – July 2023
 - Developed a **database-driven web platform** using **Python** and **MySQL**, reducing manual data handling by **30%**.
 - Optimized performance and UI responsiveness, achieving **25–30% faster page load times**.

TECHNICAL SKILLS

- Languages:** Java 11/17, Python, JavaScript (ES6+), SQL
- Backend & Frameworks:** Spring Boot, Spring MVC, Spring Security, Spring Cloud, Spring Data JPA (Hibernate), REST APIs, Microservices
- Architecture & Design:** Distributed Systems, System Design, OOP, SOLID Principles, Design Patterns, Load Balancing, Rate Limiting, Circuit Breaker (Resilience4j)
- API & Security:** JWT Authentication & Authorization, OAuth2, API Gateway (Apigee, CDP), RBAC, OpenAPI/Swagger, Postman, OWASP Top 10
- Messaging & Caching:** Apache Kafka, Redis, Event-Driven Architecture
- Databases:** MySQL, PostgreSQL, MongoDB, Query Optimization, Indexing, Transaction Management
- Cloud & DevOps:** Kubernetes (AKS), Docker, Docker Compose, Jenkins, CI/CD (Continuous Integration/Delivery), Git, GitHub, AWS (EC2, S3, Lambda, CloudWatch)
- Testing & Quality:** JUnit, Mockito, Testcontainers, JaCoCo, SonarQube, Integration Testing, Logging (SLF4J, Log4j)
- Observability:** Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), GCP Monitoring, Alerting
- Methodologies & Tools:** Agile, Scrum, Kanban, JIRA, Confluence

PROJECTS

- AI-Powered DevOps Self-Care Chatbot**
 - Engineered an AI chatbot using **OpenAI GPT API** and **Python**, resolving **60–70%** of routine DevOps queries with **sub-second** response times.
 - Cut manual DevOps effort by **40%** and architected for **high availability and horizontal scalability**.
- Production Observability & Insights Dashboard (GCP)**
 - Designed a **real-time dashboard** on **GCP** tracking error logs by severity, enabling **30–40% faster incident detection**.
- Road Safety Data Analytics Dashboard (Power BI)**
 - Aggregated large datasets improving trend analysis efficiency by **50%**, supporting data-driven safety planning.

EDUCATION

- Vellore Institute of Technology (VIT), Vellore** August 2020 – June 2024
Bachelor of Technology – Computer Science & Engineering CGPA: 8.81/10
