SUMMARY

Full Stack Engineer with 2+ years owning **15+ production microservices** serving 500K+ daily API requests on **Kubernetes (AKS)** at Gap Inc. Designs and ships **scalable distributed systems** end-to-end using **Java 17, Spring Boot, React.js, Kafka, Redis**, and **Spring Security** (JWT/OAuth2) across **Azure, GCP, and AWS**. Drives **system design** decisions, **mentors junior engineers**, and maintains production observability via **Prometheus, Grafana, and ELK Stack**.

EXPERIENCE

• Software Engineer | Gap Inc. | Hyderabad

July 2024 – Present

- Migrated **15+ microservices** (Apigee to CDP), coordinating **3 cross-functional teams** for zero downtime and **28%** security gain.
- Onboarded **S5 Stratos** into legacy infrastructure, modernizing order workflows to align with current **microservices architecture** across **5+** services.
- Deployed **JWT** and **RBAC** via **Spring Security** across all production **REST APIs**, eliminating **40%** of unauthorized access.
- Resolved latency issues by engineering **Redis** and **Caffeine** caching across **Spring Boot** services, dropping response time by **30%**.
- Designed **Kafka** event-driven workflows to decouple order and inventory services, lifting throughput by **25%**.
- Optimized **PostgreSQL** queries with composite indexing and query plan tuning, reducing p95 latency by **35%**.
- Raised **code quality** via structured **code reviews** and legacy refactoring, lowering defect rate by **22%** over two quarters.
- Maintained **80%+** test coverage via **JUnit 5, Mockito**, and **Testcontainers** across all production services.
- Authored technical **design documents** for **3** features, driving architecture reviews with senior engineers.
- Compressed releases from biweekly to weekly via **CI/CD (Jenkins, GitHub Actions, SonarQube)**.
- Cut production **MTTD** from **45 min to under 15** via **Prometheus, Grafana, and ELK Stack** alerting.
- Shipped **3 React.js** features with **Spring Boot REST APIs**, trimming order-tracking tickets by **18%**.

TECHNICAL SKILLS

- **Languages:** Java 17, Python, JavaScript (ES6+), TypeScript, C++, SQL, HTML5, CSS3
- **Frontend:** React.js, Redux, Tailwind CSS, Webpack, Responsive Design, RESTful API Integration
- **Backend:** Spring Boot, Spring Security, Spring Cloud, Spring Data JPA, REST APIs, Microservices, Kafka, Redis
- **System Design:** Distributed Systems, Scalability, High Availability, SOLID, Design Patterns, Event-Driven Architecture
- **Security:** JWT, OAuth2, TLS, Azure Key Vault, Venaafi, API Gateway, RBAC, OpenAPI/Swagger
- **Cloud & DevOps:** Azure, GCP, AWS, Kubernetes (AKS), Docker, Jenkins, GitHub Actions, CI/CD, SonarQube
- **Databases:** MySQL, PostgreSQL, MongoDB, Cosmos DB, Query Optimization, Indexing, Data Modeling
- **Observability & Testing:** Prometheus, Grafana, New Relic, ELK Stack, JUnit, Mockito, Testcontainers
- **Methodologies:** Agile, Scrum, Kanban, JIRA, Confluence, Git, GitHub, Postman

PROJECTS

• AI-Powered DevOps Self-Care Chatbot

- Automated **60–70%** of routine DevOps queries by building an **OpenAI GPT**-powered chatbot in **Python**.
- Reduced on-call escalations by **40%**; designed for **high availability** and **horizontal scalability**.

• Production Observability & Insights Dashboard (GCP)

- Accelerated **root-cause analysis** by creating a **real-time GCP dashboard** grouping **10K+ daily logs** by severity.
- Decreased **MTTR** by **25%** by integrating **Cloud Logging** and **BigQuery** with custom **alerting rules**.

• Road Safety Data Analytics Dashboard (Power BI)

- Shortened trend analysis from days to hours (**50% faster**) by aggregating **50K+** accident records in **Power BI**.
- Pinpointed accident hotspots across **10+ regions**, enabling targeted safety interventions by municipal authorities.

ACHIEVEMENTS

- **Gap Applause Award** – Won **1st place** at Gap Inc.'s hackathon; prototyped a **Java/Spring Boot** cart API.
- **Mentorship** – Trained **2** junior engineers on **Spring Boot** microservices, **code reviews**, and **production debugging**.

EDUCATION

• Vellore Institute of Technology (VIT), Vellore

Bachelor of Technology – Computer Science & Engineering

August 2020 – June 2024

CGPA: 8.81/10
